

This is a recommendation letter for the Project Management Consultancy firm “**Manas Engineers**”. It is a Surat based mid-size PMC firm headed by Mr. Sandeep Desai, who is a civil engineer having huge experience in the field of construction.

i-con Architects & Urban Planners is working with Manas Engineers company since last three years on one of the private housing and land development project. The firm is doing such a remarkable job in management with us (as an Architects) and with other service providers. They are competitive in pricing compared to others in our region but most importantly they took ownership of the project. The company is a team of dynamic and hard-working people who all are passionate and involved in their work. The firm is willing to take up new challenges and responsibilities.

We are confident that “**Manas Engineers**” shall defiantly become a very valuable asset those who are hiring them.

i-con Architects & Urban Planners
